## **Market preparation work initiated before the launch of Neola Medical's product**

**Neola Medical AB (publ) initiates market preparations before the launch of its medical device, Neola™ for continuous monitoring of the lungs of preterm born babies. The first action is a partnership with the international digital network for neonatologists, 99NICU. In "NEOvations", a new webinar series focusing on new technology for neonatology, Neola Medical will present Neola™, its lung monitoring device. The Italian neonatologist MD Ph.D. Gianluca Lista is invited by Neola Medical as keynote speaker, to talk about how the care of preterm born babies can be improved with non-invasive lung monitoring.**

Neola Medical AB (publ) today announces that the Company is initiating market preparation work before the launch of Neola™, Neonatal Lung Analyzer, which will take place after market approval by the FDA in the U.S. The work starts with a partnership with 99NICU, an international network of neonatologists, and participation in the new webinar series, NEOvations, focusing on innovative ideas for neonatal care the 14<sup>th</sup> of February.

"99NICU is a valuable platform for neonatologists to discuss and share experiences in neonatal intensive care and we look forward to presenting our product in this important forum. We believe it is important to highlight new opportunities and innovations in neonatal care and it is a great honor to have Dr. Gianluca Lista as keynote speaker for our webinar. I look forward to the presentation and the important topic of how we can improve the care of preterm born babies through non-invasive monitoring.", says Tetiana Kovtiukh Clinical Manager at Neola Medical.

### **More information about NEOvations**

The NEOvations webinars are organized by 99NICU, an internet-based neonatology network founded by staff from Karolinska University Hospital in Stockholm. 99NICU was founded as a platform for sharing experiences and expertise, regardless of location and time zone. The new webinar series aims to both provide insights into new innovations within neonatal care and to open possibilities to share knowledge and experiences. More information about the webinars and 99NICU is available here: <https://99nicu.org/99nicu-news/new-webinar-series-r134/>

### **More information about MD Ph.D. Gianluca Lista**

MD Ph.D. Gianluca Lista has a vast experience and has published more than 100 papers in international peer reviewed journals. His research focuses on experimental and clinical research of the preterm, brain and lung, during fetal neonatal transition and in the Neonatal Intensive Care Unit (NICU). Currently he is both the President of the Lombardia section of the Italian Neonatology Society, and honorary professor at the Pediatrics School of the University of Milan and temporary lecturer at the Master in Neonatology at the University of Milan. Furthermore, Dr. Gianluca Lista is the chairman of the NICU of the V. Buzzi Children's Hospital in Milan.
